

TYC priority areas

Four Seasons
Health Care

Caring for you...
personally, practically and professionally

Changes in the short term within our portfolio of homes

- Increased provision of palliative care beds
- Increased provision of dementia care beds including assessment beds
- Provision of more intermediate care beds in homes geographically closer to acute care settings

Educational needs required

- All FSHC nursing and support staff will require additional and/or revised clinical skills-
 - i.e. prior to and following any reregistration of bed provision within the homes there will need to be-
 - Review of current educational provision to the home
 - Change of training provision to the homes and enabling staff who need to be trained/ up skilled to have access to different types of training-
 - distance , face to face and /or experiential learning and support.
 - Continued collaboration with the Trust areas on particular areas e.g. syringe driver use etc.
