

Marcella Mullan, 8 South BCH

- Q1: What is your experience of PACE?**
- Q2: What difference has PACE made to the patient and you?**
- Q3: What advice would you give to a ward commencing PACE?**

PACE is still relatively new to our area and has been a big change to how we document our patient care. On a positive we no longer have to create care plans for patients, which to be honest were always poorly updated or personalised to the specific patient. Also I feel that PACE gives structure to how nursing notes are written and with the focus on being to start writing earlier in the day and updating as you go along it does feel less 'task orientated'.
