1.0 Introduction

The Clinical Director of the HSC Safety Forum (NI) asked NIPEC to take forward a regional project to address Recommendations 1 and 11 contained within the Regulation and Quality Improvement Authority Report on the *Review of Hospitals at Night and Weekends* (RQIA, 2013). As part of the project, this Competence Assessment Tool was developed by the regional Task and Finish Group, chaired by Brenda Creaney, Executive Director of Nursing and Patient Experience, Belfast Health and Social Care Trust. Membership of the Group included senior representatives from key stakeholders including the five HSC Trusts, NIPEC, Professional and Staff Side Organisations and regional Human Resources representation.

This Competence Assessment Tools comprises the minimum core elements required of all professionals undertaking the role of Senior Nurse/Patient Flow. Each HSC Trust can build on these when recruiting and selecting for specific posts within their organisation.

To find out more information about the Career Pathway and supporting resources for all Senior Nurse Out of Hours roles, including Senior Nurse/Patient Flow, Senior Nurse/Hospital at Night and Senior Nurse/Hospital at Night and Patient Flow, visit:

1.1 Development of the Competence Assessment Tool

The development of the Competence Assessment Tool began by undertaking a comprehensive review of local, national and international literature to source competency frameworks and competencies relevant to the Senior Nurse/Patient Flow role.

Once the competency areas and statements were agreed by the Task and Finish Group, the Competence Assessment Tool was refined over a period of four months through engagement with a wide range of key stakeholders throughout Northern Ireland, which included: Senior Managers; Human Resources and representatives from Education, Professional and Staff Side organisations. The Competence Assessment Tool was approved by the Task and Finish Group in March 2016.

1.2 Who is the Competence Assessment Tool For?

This Competence Assessment Tool will apply to a professional undertaking the role of Senior Nurse/Patient Flow. Titles may differ for this role within individual HSC Trusts and could either be Senior Nurse/Patient Flow, Bed Manager or Night Sister. The roles, however, are similar and include facilitating the flow of patients through the acute hospital/s within the Trust.

2.0 The Competence Assessment Tool

The Competence Assessment Tool is underpinned by the Nursing and Midwifery Council's *Code*: (NMC; 2015) and is designed to help you consider how well you do your job.

The next few pages provide information for you on how to:

- use the Competence Assessment Tool to assess yourself and get others to assess you
- provide evidence for renewal of your registration and revalidation with the Nursing and Midwifery Council (NMC)
- provide evidence of achievement for your KSF personal development plan
- use your assessment results to focus on your development needs, prepare for supervision meetings and support your career development.

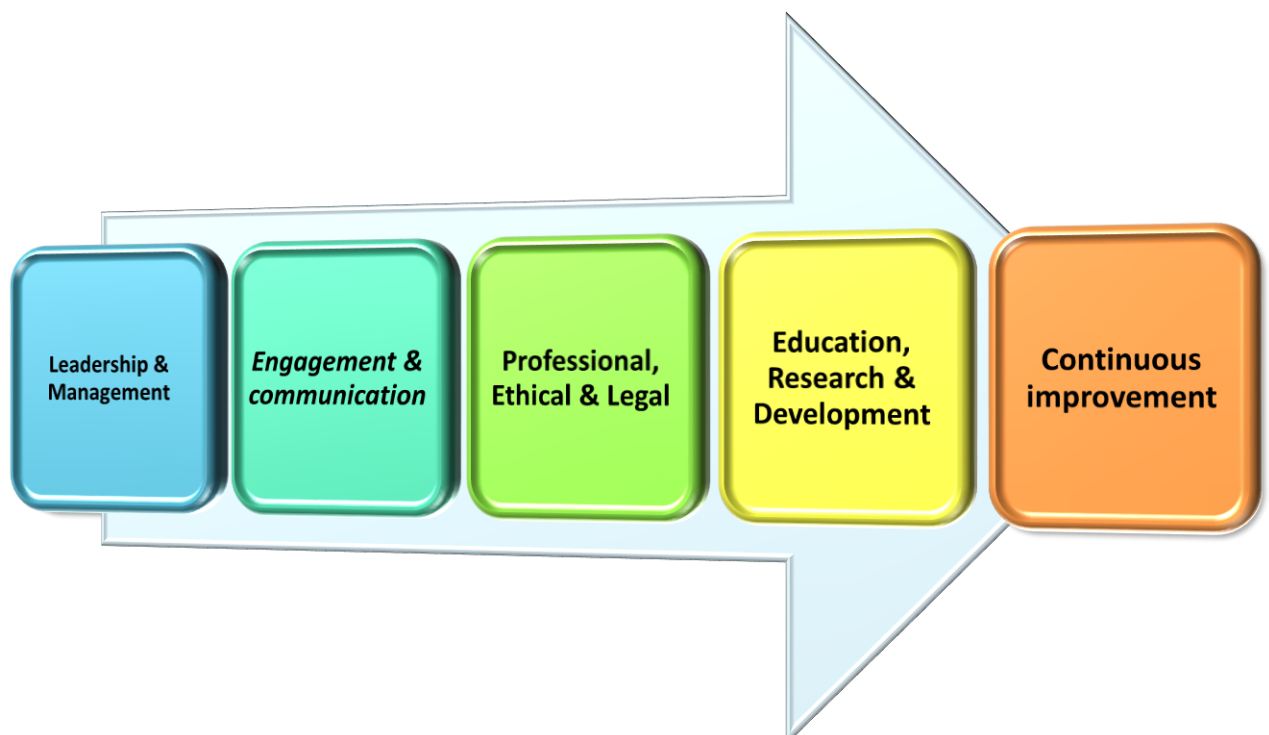

The Tool is made up of five core competency areas (Figure 1) that are applicable for all those undertaking the role of Senior Nurse/Patient Flow. Within each competency area is a list of competence statements that you can use to assess yourself against and plan for your learning and development.

The Tool is made up of six core competency areas (Figure 1) that are applicable for all those undertaking the role of Senior Nurse/Hospital at Night.

Within each competency area is a list of competence statements that you can use to assess yourself against and plan for your learning and development. A copy of The Competence Assessment Tool is available at:

2.1 How will I benefit from using the Competence Assessment Tool?

The Competence Assessment Tool can help you identify the knowledge and skills required for your role.

By undertaking a self-assessment you can use the results to prepare for supervision meetings and identify areas which you find challenging and need further development in.

The assessment tool can also enable you to focus on areas for career development and where relevant, support your preparation for job interviews. It can also be used in conjunction with other Competencies relevant to your role as a Senior Nurse/Patient Flow.

The five core competency areas within this tool have been mapped against the core and relevant specific dimensions of the NHS Knowledge and Skills Framework (KSF; DH, 2004). The areas expand on the dimensions covered by KSF and the competence statements provide you with specific competency requirements for the role of Senior Nurse/Patient Flow.

This has been done so that you can use your assessment results to help you provide evidence for your annual KSF development review meetings. You can then agree your learning and development outcomes, with your line manager, which are relevant to your post outline.

Your assessment results and related reflections can be entered into your online portfolio, or completed on a hard copy. To create and build your own confidential portfolio online visit <http://nipecportfolio.hscni.net/>

This will help you to evidence your competence and related learning and development needs and meet other requirements such as renewal of your NMC registration and revalidation.

To complete your assessment and add it to your portfolio, visit <http://nipecportfolio.hscni.net/compro/ReadOnly/CompSelect.asp>

You can use your online portfolio to:

- Keep details about your career journey to date
- Keep information to help prepare for your appraisal, review or revalidation
- Show what you have learned through your day-to-day experiences
- Store information about your learning activities
- Get help to write a reflection.

2.2 How do I use the Competence Assessment Tool?

The Competence Assessment Tool allows you to build up a picture of how you are performing in your role. It is up to you to decide how much of the Competence Assessment Tool you wish to use. Figure 2 presents an outline of the steps you should work through, to get the most benefit from the Assessment Tool.

Figure 2: Learning and Development Framework

Step 1	Assess your knowledge and skills using the competence assessment tool to find out about your learning and development needs. Follow the instructions on http://nipecportfolio.hscni.net/compro/ReadOnly/CompSelect.asp to enable you to complete your assessment online. Compile your evidence to support your assessment.
Step 2	Plan your learning and development needs from your assessment results, including any 360° feedback and other sources of information. Record and prioritise your overall learning and development needs with your line manager using your KSF personal development plan.
Step 3	Implement the learning and development activities agreed with your line manager in your KSF personal development plan. This should include a meeting with your line manager to discuss progress.
Step 4	Evaluate your learning and development in relation to improvements in your knowledge and skills with regard to your role. Maintain a reflective record of your learning and development in your portfolio at http://nipecportfolio.hscni.net/ to support your preparation for your supervision sessions or development review meetings.
