

The Project Board met bi-monthly and was responsible for: -

- Steering the design of the Development Framework
- Ensuring consultation with relevant stakeholders on aspects of the Framework as required
- Making recommendations for implementation to the DHSSPS

In addition to this work, a further two projects were commissioned: -

Development Framework – an electronic resource

The aim of this tender is to create an accessible electronic resource supporting the Development Framework for nurses and midwives in Northern Ireland by:

- a. creating an electronic interactive resource linking individual components in a user-friendly way;
- b. enabling individuals and or organisations to access the electronic Development Framework resources to support personal and professional development;
- c. creating a system capable of being updated, as appropriate, to reflect changing service and user needs.

Development Framework II – an electronic resource

The aim of this tender is to:

- a. audit the appropriateness and applicability of the seven generic domains and the generic performance indicators to modern nursing and midwifery roles in Northern Ireland;
- b. test, through a pilot, the ease of use of the performance indicators in assessment of performance.
